PROFILE

Dedicated and analytical Electrical and Computer Science student with proven expertise in VLSI design, automation systems, and software development. Experienced in data analysis, research methodologies, and technical communication with a strong track record in project management and team collaboration. Currently contributing to cutting-edge research projects while developing innovative web applications and automated systems. Committed to leveraging technical skills and analytical mindset to drive successful project outcomes in technology-driven environments.

EDUCATION

VIT Chennai
2024-2028

Bachelor in Electrical and Computer Science

Expected Graduation: July 2028 Active participant in Power Electronics and EYSCOM research projects Currently engaged in Software Development project under CINI SRIP 2024 .

Kendriya Vidyalaya

High School Diploma

Graduated: April 2024 Ranked in top 10% of graduating class Strong foundation in mathematics, physics, and computer science

WORK EXPERIENCE

BCPL- Dibrugarh
May 2025 – June
2026

Student Intern

- Studied advanced principles of VLSI design and automated systems through intensive workshop programs
- Collaborated with senior engineers to develop enhanced project management strategies for incoming technical projects Analyzed team dynamics and workflow processes to optimize project execution efficiency

Inamigos
Foundation
June 2026-July
2026

AI Web Development Intern

- Built and maintained responsive web applications, improving usability and cross-device compatibility.
- Worked collaboratively in an agile development environment to implement frontend features, troubleshoot issues, and enhance application performance.

Center of
Neuroinformatics,
VIT Chennai
May 2026-Present

Research Intern

- Conducting research on neuroinformatics applications and data analysis techniques
- Developing software solutions for neuroscience data processing and visualization

SKILLS

Professional

- Python, Typescript, HTML, CSS, C, Java
- React.JS, Flask, FastAPI
- Responsive Web Design
- Android Studio
- Firebase
- Git, Github
- Vercel
- Ardiuno, IoT Systems
- ML, NLP, spaCy
- Data Analytics
- AI-based Web Application development

Personal

- Project Management
- Data Interpretation
- Team Collaborations
- Leadership Qualities
- Technical Communication
- Problem Solving
- Analytical Thinking

CERTIFICATIONS AND ACHIEVEMENTS

Professional

- Government Certified Full Stack Web Development Certification
- VLSI Design & Implementation Certification
- Certification - Technical Training Program
- Artificial Intelligence & Machine Learning Certification - Online Specialization
- Certification in SQL Analytics and BI on Databricks

Academic

- Top 10% Academic Performance - High School (2024)
- Active Researcher - CINI SRIP 2025 - 2026
- Program Project Contributor - Power Electronics & EYSCOM Research Initiatives
- Contribution in multiple hardware and software projects
- Contributor in GirlScript Summer of Code 2026

PROJECTS

StockGlobe

- Tech: React, TypeScript, FastAPI, AI APIs
- Developed an AI-powered stock analysis platform providing real-time market insights, interactive visualizations, and intelligent stock recommendation.

Travel-Partner-Finder

- Tech: Android Studio, Java, Firebase
- Resume bullet:
- Built an Android application that connects travelers based on destination, route, and schedule preferences using Firebase backend services.

ResumeAnalyser

- Tech: AI/ML, NLP, Python, HTML, CSS TypeScript
- Developed an AI-based resume analyzer that evaluates resumes, extracts key skills, and provides personalized improvement recommendations.

SoleRift

- Tech: Next.js, Tailwind CSS, Framer Motion, TypeScript, Anton
- Designed and developed SOLERIFT, a brutalist streetwear shoe brand website featuring a live product drop countdown, interactive cart system, filterable collection grid, and neon micro-interactions – built using Antigravity AI with a custom dark navy design system.
